

# Building Html Pages

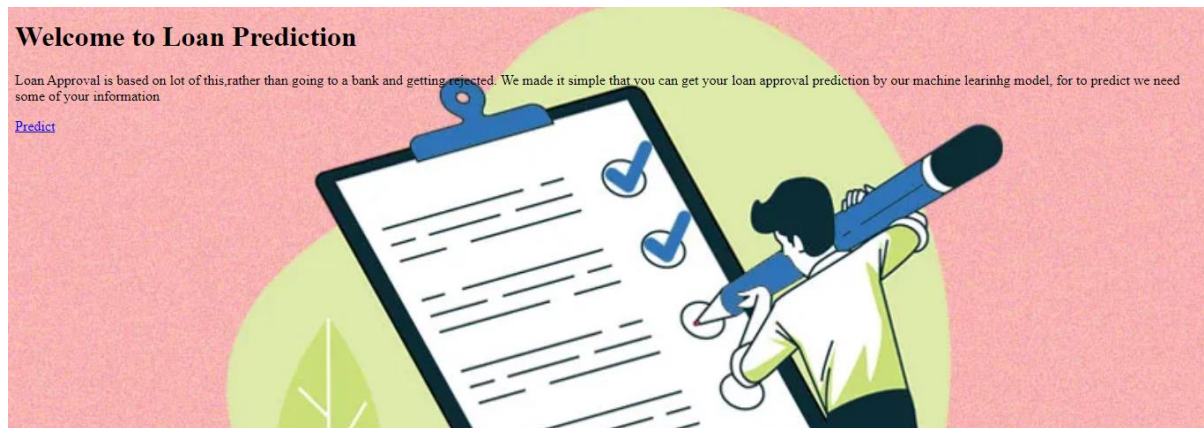

Date	10 october 2022
Team Id	PNT2022TMID39080
Project Name	Smart Lender-Applicant Credibility Prediction for Loan Approval

I am created three HTML files namely

- **home.html**
- **predict.html**
- **submit.html**

and save them in the templates folder.

Let's see how our home.html page looks like:

Now when you click on predict button from top right corner you will get redirected to predict.html

Lets look how our predict.html file looks like:

Enter your Details for Loan Approval Prediction
